

**Galilean Nights Event ID:** gn1,011

**Number of telescopes:** At least 2

**Number of organisers:** about 10

**Number of attendees:** 200

**Event Report:**

In the school we organized a few events of the Galilean Nights.

Oct., 12. Alexander Prokofiev ("AstroDnep" Club of Amateurs of Astronomy, Dnepropetrovsk) carried out 3 lectures for the schoolchildren of the 6-7 forms (approx. 90 children) about Galileo and his contribution to science (<http://www.astroclub.kiev.ua/forum/index.php?topic=9933.0> reply 4).

Oct., 16. At the classes "Art culture" approx. 30 schoolchildren from the 5, 6 and 9 forms took part in an art competition "Starry Sky". The rewarding of the competition was carried out on Oct.,22.

Oct.20. Schoolchildren of the 11th form Dyukarev Yaroslav and Zhad'ko Bogdan made short lectures "Biography of Galileo" (duration 15 min) for 60 pupils of the 5th form.

Oct., 22-24. The star party was not good because of cloudy weather. Yet on Saturday Oct., 24 about 25 pupils could made evening observations of the Moon and Jupiter by themselves. Galushchenko Danil (the 6th A form) used a spyglass and Lisitsky Sergey (the 7th A form) used a small telescope in the observations. The most successful observations were carried out by Lisitsky Sergey. It's impossible to get more information on the observations for they were at school vacations and pupils had not return to the school because of a quarantine in the country till Nov., 23.
