

Galilean Nights Event ID: gn1,108

Number of telescopes: 3

Number of organisers: 5

Number of attendees: 40

Event Report:

Our event was certainly successful enough with about 40 UCF students visiting and viewing Jupiter through our set of 8-inch Meade LX90 telescopes. The weather and seeing were quite good; everyone could make out the satellites but we were also impressed by how much of the atmospheric detail on Jupiter itself was visible as well!
