**Number of organisers:** 2

**Number of attendees:** 200

**Event photos:** <http://www.flickr.com/photos/60818399@N00/sets/72157622719433886/>

**Event Report:**

The organizers: Arie Blumenzweig and me (Eden Orion) changed the location to Tel-Aviv Harbor Because of Nike Night run that took place that night. The Place was quite crowded, warm and clear from clouds. I showed the Moon about X100 magnification while Arie showed Jupiter and its moons with about X150 Magnification. Most people were amazed and told us this was their first time with telescope and that the view is magnificent. The observation took about 3 hours.
