

Galilean Nights Event ID: gn1,213

Number of telescopes: 5

Number of organisers: 20

Number of attendees: 4000

Event Report:

The weather on Oct. 22th and 23th was good for astronomical observations. The centre of the town is not the place for this, but there was many of people. They thanks for possibility to look Moon and Jupiter with Gallilean satellites. Exsept observations we shows presentations for Jupiter, Moon, exoplanets, Hubble's telescope, astrophotos of our observatory. Gallilen Nights was feast for all of us. This events was top-news of all medias in our town .
