

Galilean Nights Event ID: gn20

Number of telescopes: 2

Number of organisers: 1

Number of attendees: 100

Event Report:

I organize a programme "know the Jupiter" programme during the Galilean night

I want to show the Jupiter and its four moons, I would like to remind the people that On 1994 July 16-22, over twenty fragments of comet Shoemaker-Levy 9 collided with the planet Jupiter.

My audience were school children of age range 10 to 17 years.

Numbers of participation were about 100 students.

All students were keenly interested to know about the moons of the Jupiter and Shoemaker Levy 9's effect on the surface.
