

Galilean Nights Event ID: gn219

Number of telescopes: 2 telescopes

Number of organisers: 3

Number of attendees: 20

Event Report:

Galilean Nights was the activity that took place in the Fortress of Oradea, October 23-th 2009.

This activity would have two parts: a multimedia presentation in the Fortress of the town and astronomical observation in the Independence Square near Mihai Eminescu's statue. Unfortunately, the overcast sky made it impossible any observation.

The evening started with PowerPoint presentation:

1. Galileo Galilei-student Georgiana Gavra;
2. Jupiter and galileean satellites- students Ioana Porumb and Madalina Jipa;
3. Saturn- students Anca Negru and Madalina Mantu;
4. The Moon- student Ioana Matiuta.

The overcast sky do not allowed us to observe the constellations, but we watched a movie with October-December's constellations.

The evening ended with the presentation of beautiful astrophotos made by Vesselnyi Tibor.

The students who participated in this activity were from "Aurel Lazar" High School, "Emanuil Gojdu" National College, "M. Viteazul" Technical College, "Oltea Doamna" School, members of astroclub "Meridian 0" from Oradea.

The student Iulia Popescu from "Emanuil Gojdu" National College from Oradea has design a paper with information and data on this activity.
