

**Galilean Nights Event ID:** gn247

**Number of telescopes:** 15

**Number of organisers:** 5

**Number of attendees:** 7

**Event Report:**

Due to bad weather (cloudy and rain) there were almost no visitors on this event. We had downloaded the presentations of the website of Galilean Nights as a backup plan. The attendees went first to our ISS-model and our earth-model (1,2 m diameter) where we discussed the mission of Frank De Winne on board the ISS (Frank is from this region). Afterwards we talked about astronomy.
