

Galilean Nights Event ID: gn26

Number of telescopes: 1

Number of organisers: 4

Number of attendees: 40

Event Report:

We tried both 23rd and 24th at one venue each night but 23rd was clouded out. On 24th it was mostly cloudy but all got to view Jupiter & sats. through 20cm scope. Indoor activities were a Galileo movie, slides from the Hubble gallery, and computer-based astronomy exercises.
