

Galilean Nights Event ID: gn264

Number of telescopes: 2

Number of organisers: 4

Number of attendees: 0

Event Report:

Our event was cancelled because of a bad weather. The primary objective was to observe and that's the main reason why we didn't make any backup plan with indoor activities. Plan B was to have a substitute observation after school holidays (after 11 days). The plan B event was also cancelled because of a bad weather. We are planing a bigger observation of Jupiter in the middle of December. We hope for a better weather this time.
