

Galilean Nights Event ID: gn283

Number of telescopes: 6

Number of organisers: 5

Number of attendees: 250

Event Report:

Between 22-24 October, 2009 dates, there was a Galilean Nights activities for public at Canakkale Astrophysics Research Centre & Ulupinar Observatory by Physics & Astronomy Club students. With these wonderful activities we have a chance to tell something about astronomy, IYA2009 Projects, astronomy & astrology, observatories etc. to the participants. We've observed Galilean objects with galileoscopes & other prof. telescopes. Watched the documentaries including "Eyes on the Skies". Answered questions of participants about astronomy.
