

Galilean Nights Event ID: gn295

Number of telescopes: 1

Number of organisers: 1

Number of attendees: 70

Event Report:

The event brought new look of the sky to University students who spent much time never bothered on how the sky looks like or seeing the difference on what is available in sky above.

We had nice moment of sharing ideas and discuss the unknowns about stars, Moon and the planet Jupiter which we never thought as it shine right above us.
