**Event Report:**

Hello everybody,

With love from Saffet Simavi Primary School in İstanbul. Firstly, we prepared 2 big brand afiches. They hanged our scholl's faces. Thus, we invited all people this great wedding. At last, we successfully realized Galilean Nights, 22-24 October. Fortunately, the weather was very good, not clouds. We observed, Moon, Jupiter and its Galilean satellites, Polaris, of course Vega, Deneb and Altair triangle sth. And also about talking to attendees its stories. Our attendees are our scholl students, teachers and native people. Finally, I want to thank you, for this organizationes and its organizers, on the world. From Turkey with love. Bülent YANIK.
