

**Galilean Nights Event ID:** gn486

**Number of telescopes:** 8

**Number of organisers:** 10

**Number of attendees:** 75

**Event Report:**

What a great night we had. The sky cleared up after being overcast for over a week and we got to enjoy bringing views of Jupiter and the Moon to many newcomers to the hobby. It was amazing on how many showed up just due to the site of several 16" telescopes in the middle of a parking lot and one dedicated friend to the club willing to wave lightsabers by a busy road to get people's attention. Thanks to all who helped out.
