

Galilean Nights Event ID: gn517

Number of telescopes: 5

Number of organisers: 300

Number of attendees: 1000

Event Report:

The Event was a day affair with an Expo display this amounted to a plan B effort as we had to cancel the viewing session due to clouds. We however had many visitors and gave explanation on the use of the telescopes as displayed and showed videos of the "400 Yrs of the telescope" and NASA's space 40 years of space Exploration, with a large volume presented to us by the US embassy in Kingston, over 30 new members were signed in for the Astro club. DVD's were handed out along with maps of the Night Sky. The program lasted all day and the Booth attracted a lot of attention from visitors and the Media.
