

Galilean Nights Event ID: gn536

Number of telescopes: 5 telescopes, 2 binoculars

Number of organisers: 10

Number of attendees: 15

Event photos: None

Event Report:

We were going to watch surface of the Moon, belts on Jupiter, and Galilean Moons. We were going to talk about the constellations which were visible that evening, and related Greek mythologies. However, it rained, so we showed slides about watching night sky (constellations and Greek mythologies) and we invited questions about the universe.
