Number of telescopes: 2

Number of organisers: 3

Number of attendees: ~300

Event photos: <http://www.flickr.com/photos/museudoecclipse/sets/72157622719331366/>

Event Report:

Parque da Cidade is a square in Sobral periphery. Saturday is good day in this place. Many young people with your parents.

We put our telescopes in the Moon and in Jupiter.

Many surprises for the people, many never have had the opportunity to see celestial bodies in a telescope before.
