

Galilean Nights Event ID: gn578

Number of telescopes: 4

Number of organisers: 4

Number of attendees: 55

Event Report:

We were rained out on the 23rd and had a lot of clouds on the 24th. We did set up on the 24th and had some nice breaks in the cloud cover. We viewed our Moon, Jupiter, Io occulting Europa, several star clusters and binary stars.
