**Event Report:**

The event lasted only one day, October 23, 2009, and it was held, due to bad weather, at the National College of Informatics in Piatra Neamt (Romania)! The specific activities have been a brief explanation of the astronomical instruments supplied to the local group of amateur astronomers (Astronomical Association Galileo Neamt SARM) and video projections having astronomical theme. After, have been mentioned sites dedicated to the observation of the sky by robotic systems online! Finally a group of students, ages from 16 to 18 years, led by one Professor of Physics of the College, Mrs. Diana Cristina Bejan, has prepared a short dissertation on the bodies of the solar system!
