

Galilean Nights Event ID: gn91

Number of telescopes: 3

Number of organisers: 5

Number of attendees: 50

Event Report:

We organized an observation aboard a ship (a schooner of Cantabria's government), with a limited capacity to 50 people.

That night it was cloudy and sometimes a light rain. For that, we postpone the observation to the next Saturday and we only can talk to the public a few words explaining what we could observe in the sky.
