

**Galilean Nights Event ID:** gn936

**Number of telescopes:** 1

**Number of organisers:** 1

**Number of attendees:** 80

**Event Report:**

Galilean Nights

This event was prepared and organized by Dr Zdenek Vanicek of the Faculty of Electronic Engineering, Czech Technical University in Prague, for fellow citizens of a little village VINARICE, East Bohemia (population 150). Since the event was badly affected by the very bad weather, two lectures were held instead: 1. About the recent Association of Space Explorers XXII Planetary Congress in Prague, 5 – 9 October 2009; 2. About Galileo Galilei and his Jupiter observation.

On Sunday and Monday 23rd and 24th October we were lucky at last and could observe Jupiter and its four Galilean moons on a bright clear sky above our village.
