

**Galilean Nights Event ID:** gn950

**Number of telescopes:** 6

**Number of organisers:** 2

**Number of attendees:** 130

**Event Report:**

Daytime scope demo at Colorado Astronomy Day. 2 Hydrogen-alpha solar scopes showed a number of prominences. Unfiltered scopes watched an insect crawling on a post on top of a 10-story building 2 blocks away. Lots of enthusiastic visitors of all ages. Daytime attendees: ~100

Skylazing thru 7 scopes ranging from a Galileoscope through a 25" Dob. Great view of the moon, Jupiter, various double stars, globulars, and various bright planetaries and galaxies. Many 1st time attendees showed up in response to a notice in neighboring Loveland's newspaper. This was our 2nd ~monthly viewing session at the Fossil Creek Reservoir site. Evening attendees: ~30
