

**Galilean Nights Event ID:** gn977

**Number of telescopes:** +10

**Number of organisers:** +20

**Number of attendees:** +500

**Event Report:**

Dears,

Our goal to holding the White hearts, Clear sky event was to create a new approach for those who love astronomy but they do not find a good way to start.

Fortunately our country was the host of international astronomy Olympiad and i think this was the best motivation for us to make our event better than ever.

AS we expected, the Galilean Night event was held better than all we had before, Lots of people had attended the event and it was wonderful. The event was full of innovations, For the first time we had a wide range of equipments of all kinds plus two data projection which had completed the multimedia part of our event. Showing some clips of shuttle launch, lecturing about the planet "Jupiter", Galileo, The solar system, And more were the most important part of the event, In addition holding a perfect observing night had completed the night.

we had held the event for 2 nights because we had a very bad weather condition in the last night and it was not possible to hold the event.

Regards,

Seyed Iman Miri
