**Event Report:**

we tried to show to the people which masses that discovered by Galileo in 400 years ago.like moon and its seas,Jupiter and its 4 major moons,sun and its spots.Then we tried to show them some constellation,and some messier mass.Then we gave them telescopes and binoculars and let them to found everything that they want and we helped them of course.It was very interesting,2 of them could find 3 or 4 messier masses without any help from us.They enjoyed very much.A lot of our attendees were children and they asked a lot of questions,we really tried hard to answer to them.All of us enjoyed very much from this program.Thanks a lot for your help.
