

Galilean Nights Event ID: gn1,111

Number of telescopes: 3

Number of organisers: 1

Number of attendees: 64

Event Report:

Public observatory open from 3-9 p.m. MDT for solar (H-alpha and white-light filter) viewing and Moon/Jupiter after sundown. Clouded/winded out for all but the last hour, when light clouds still prevented decent views most of the time. No formal Plan B activities, other than the museum/planetarium we are part of (the latter showed programs at 4, 7, and 8:15 p.m.).
