

Galilean Nights Event ID: gn452

Number of telescopes: 12

Number of organisers: 5

Number of attendees: 200

Event Report:

Very good evening

An ideal weather report after the torrent of the day before (wakefulness) très little just wind little in him (her, it) after noon (south) to remove the remaining humidity of the rain thus no humidity a great transparency but a little of seeing all the same, entitled conference " of Galilee in the modern astronomy " Exhibition (Exposure) on the big subjects of the astronomy to post 2.50mX1.00 m Video in buckle on the solar system atmosphere very nice buffet with tasting of wines (coast (rib) of Provence golden medal-holder) after the conference
