

Galilean Nights Event ID: gn570

Number of telescopes: 3

Number of organisers: 2

Number of attendees: 15

Event Report:

It was cloudy here. We were so unlucky. We could not watch stars again as same as April event.

But this time, we put on 3 telescopes in front of my house.

Our friends, neighbour people and children came, and watched light on the top of mountain or so, and touched the telescopes.

They were interested in the telescopes. We told Galileo's episode to them.

They said that they wanted us to watch Jupiter. So This event will be open soon again. Never give up!
