

Galilean Nights Event ID: gn616

Number of telescopes: 1

Number of organisers: 2

Number of attendees: 60

Event Report:

Plan A: Open sky eye observation. Sunset observation. Location of cardinal points using the south cross.

Spring sky constellations for south hemisphere.

Plan B: PPS about International Astronomy Year (made at home) and others about religious dates according to the moon calendar (easter, carnival) or sun calendar (christmas).

We did both planes.
