Event Report:

On Saturday on 24th of October Galilean Nights, unfortunately, did not manage to be conducted because of bad weather.

Therefore I have transferred all action on Sunday, 25th.

25th weather was much better.

I have arrived to the place of realisation of action and began to adjust a telescope. At once has around gathered to a few people.

Galilean Nights were opened by the little girl in the pink jacket, the first of come, having looked in a telescope.

Observed the Moon and Jupiter with Galilean satellites.

Children were delighted, and their parents told gratitude words.

In total have come to look to a telescope more than 50 persons.

Galilean Nights in Kremenchug have taken place!
