Event Report:

Unfortunately it was a rainy evening in Ljubljana and the observation was not possible - but we didn't despair.

A few most enthusiastic people, that came to the observatory "Gimnazija Sentvid", for who we have prepared two interesting lectures about "The beauty of the night sky" and about "The Slovenian and foreign astronomers over time", weren't dissapointed.

We made the same effort as if the weather was good and as if we had 500 visitors or more.

Any such astronomical and social gathering makes our world better and enriches the astronomy.
